

## Cleanity Premium

### Description & Application

---

Abrillantador Vajillas is an additive for industrial dishwashers and washing machines.

### Characteristics

---

It does not produce foam, making it suitable for cleaning operations of every kind of utensils and accessories in washing machines such as dishes, bottles, cases, etc.

To be used as an additive in the final rinse in dishwashers or automatic washing machines, providing a quick drying, without veils or limescale residues.

Suitable for use in waters of all hardness indexes.

Avoid contact with surfaces sensitive to acids, such as marble, cement and calcareous surfaces.

### physico-chemical properties

---

Aspect	Liquid
Color	Blue
Density at 20°C	1,02 g/cc
pH	3
Solubility	Completely soluble in water
Dose	0,03% - 0,15%

### How to use

---

**Automatic washing machines:** Automatic dosing at a temperature between 70°C - 85°C and at a dose between 0.03% and 0.15%.

**Dishwashing machine:** Automatic dosing in the final rinse at a temperature between 70°C - 85°C and at a dose between 0.03% and 0,06%.

### Precautions and environmental information

---

Check the product safety data sheet.

The raw materials used in this formulation meet the criteria of sustainable development promoted by the "Charter Project for Sustainability".

The surfactants used in this formulation comply with the biodegradability criteria stipulated in Regulation (EC) No. 648/2004 on detergents.
