Cleanity 
solutions

Description

Neutral Degreaser is a highly effective foaming product for cleaning any washable surface, especially designed for manual cleaning.

Characteristics

The Neutral Degreaser is a cleaner formulated to complete the cleaning with pressurized water machines, in those areas where this system is not able to access to remove all the dirt. In these areas it is necessary a manual cleaning by the operators and for this work the Neutral Degreaser avoids risks of burns and injuries due to its pH close to that of the skin.

It can be applied on most common surfaces present in the industry: walls, floors, machinery, conveyor belts, utensils, benches and work tables.

Suitable for use on aluminum surfaces, and other materials easily attacked by acids.

Physico-chemical properties

Aspect	Clear liquid
Colour	Slightly yellow
Density at 20°C	1,025 g/cc
pH	7,5
Solubility	Complete
Dose	Pure, 1% - 5%

Instructions for use

Foam generating equipment: It is a foaming product, so it can be used with foam generating machines at the dilutions recommended for manual use, between 1% and 5%, depending on the dirt present. Pre-rinse the area to be cleaned with pressurized water to remove coarse residues. Then cover the area to be cleaned with foam. Leave to act for a few minutes and then rinse thoroughly with plenty of drinking water.

Manual: The surfaces, after a previous rinsing, should be rubbed with a cloth or brush and a dilution of Neutral Degreaser between 1% and 5%, depending on the dirt. Then rinse with water. For stubborn stains and very dirty localized areas, apply the product undiluted. Leave to act for a few seconds. Rub with a scouring pad or brush. Rinse.

Immersion. Small tools can be cleaned by immersing them in a dilution of Neutral Degreaser between 1% and 5%, depending on the dirt and incrustations. Leave the product for a few minutes. Then remove from the bath and rub with a scouring pad or brush.
